BACKGROUND

Florida-licensed Registered Dental Hygienist with three years of hygiene-led patient care in Nepal: prophylaxis, scaling and root planing, periodontal assessment, digital radiography, oral-pathology screening, and patient education. A **Bachelor of Dental Surgery** from Rangpur Dental College adds anatomical depth and easier collaboration with the doctor.

U.S. PREPARATION

60-hour dental-assistant externship at Advanced Dental Solutions, Pittsburgh: chairside flow, four-handed dentistry, intraoral imaging, bitewings, periapicals, HIPAA-aware records. Dedicated dental-assisting course with hands-on radiography. Florida local-anesthesia certification through the University of Florida: coursework, examination, and clinical requirements complete; certification in final processing.

AT THE CHAIR

I work through periodontal charting, soft-tissue and radiographic findings, and patient history together, then explain findings to patients in plain language - in Nepali, Bengali, Hindi, or English.
